DETAILED ACTION

- 1. Applicants' Preliminary amendment and remarks filed 09 October 2005 is acknowledged and entered.
- Your application is assigned to Art Unit 1655 at the United States Patent and Trademark Office (i.e., USPTO). The assigned Examiner to your application at the USPTO is Dr. Kailash.
 C. Srivastava. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Examiner Kailash C. Srivastava in Art Unit 1655.

Claims Status

3. Claims 1-53 are pending.

Election /Restriction

4. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I, consisting of claims 1-10, 24-25 and 48-49 drawn to a method to sterilize adventitious agents in a biological material, classified under Class 426, subclass 232, for example.

Group II, consisting of claims 1,11-12 and 44, drawn to a method to sterilize adventitious materials in a biological product with a prepackaging treatment with antioxidants, classified under Class 426, subclass 541, for example.

Group III, consisting of claims 1, 11,13 and 45, drawn to a method to sterilize adventitious materials in a biological product with a prepackaging treatment to remove lipids, classified under Class 435, subclass 366, for example.

Group IV, consisting of claims 1, 11, 14-15 and 46, drawn to a method to sterilize adventitious materials in a biological product with a prepackaging treatment to withdraw metal ions with chelation, classified under Class 426, subclass 271, for example.

Group V, consisting of claims 1, 11 and 16, drawn to a method to sterilize adventitious materials in a biological product with a prepackaging treatment to remove water, classified under Class 34, subclass 284, for example.

Group VI, consisting of claims 1, 11, 17-23, 40-43 and 47, drawn to a method to sterilize adventitious materials in a biological product with a prepackaging treatment with radiations, classified under Class 426, subclass 248, for example.

Group VII, consisting of claims 1, 26-29 and 50-51, drawn to a method to sterilize adventitious materials in a biological product, wherein the product is packaged in two packages, classified under Class 426, subclass 106, for example.

Group VIII, consisting of claims 1, 30-39 and 52-53, drawn to a method to sterilize adventitious materials in a biological product with a prepackaging step to treat the product with an inert gas, classified under Class 426, subclass 312 0r 313, for example.

Linking Claims

5. Claim 1 and 11 link inventions in groups I-VIII. The restriction requirement between the linked inventions is subject to the non-allowance of the linking claims, identified above. Upon the allowance of the linking claims, the restriction requirement as to the linked inventions shall be withdrawn and any claims depending from or otherwise including all the limitations of the allowable linking claims will be entitled to examination in the instant application. Applicants are advised that if any such claims depending from or including all the limitations of the allowable linking claims are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. §121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131- 32 (CCPA 1971). See also MPEP §804.01.

Inventions are Independent and Distinct

6. The inventions are distinct, each from the other because of the following reasons:

Inventions in Groups I-VIII are unrelated to each other because each one of them is directed to different inventions that are not connected in design, components, operation and/or effect. These inventions are independent since they are not disclosed as capable of use together. They have different modes of operation, they have different functions, and/or they have different effects. One would not have to practice the various methods at the same time to practice just one method alone (MPEP § 806.04, MPEP § 808.01). In the instant case, for

example invention recited in claims encompassed in Group II is directed to a method requiring a composition and step that is not required for the method of Claims encompassed in Group VII method. Thus, the methods in each of the inventions of Group II and VII have a different effect. Therefore, the methods claimed in inventions II and VII for e.g., may not be practiced together. Similarly methods in inventive Groups I, III-VI and VIII do not have the same components and therefore, each of inventive groups I-VIII will not be practiced together/simultaneously.

The inventions discussed above are independent and distinct, each from the other. They have acquired a separate status in the art as a separate subject for inventive effect and require independent searches. The search for each one of the above inventions is not coextensive particularly with regard to the literature search. Further, a reference that would anticipate the invention of one group would not necessarily anticipate or even make obvious another group. Finally, the consideration for patentability is different in each case. Thus, it would be an undue burden to examine all of the above inventions in one application.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification (i.e., Class and subclass), and their recognized diverse subject matter, they would illicit an undue burden on the examiner to search and examine all the inventions in groups I- VI in one single application. Furthermore, the criteria for patentability may not be same for each of the recited groups and what may be applicable for one group may not at all be applicable to other group. Thus, restriction for examination purposes as indicated is proper.

7. Applicants are advised that a reply to this requirement must include an identification of an invention elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicants will be entitled to consideration of additional claims which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR §1.141. Currently, Claim 1 is the only generic claim. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicants are reminded that upon the cancellation of claims to a non-elected invention,

the inventorship must be amended in compliance with 37 CFR §1.48(b). Any amendment of inventorship must be accompanied by a petition under 37 CFR §1.48(b) and by the fee required under 37 CFR §1.17(I).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Kailash C. Srivastava whose telephone number is (571) 272-0923. The examiner can normally be reached on Monday to Thursday from 7:30 A.M. to 6:00 P.M. (Eastern Standard or Daylight Savings Time).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dr. Terry McKelvey, can be reached on (571)-272-0775 Monday through Friday 8:30 A.M. to 5:00 P.M. The fax phone number for the organization where this application or proceeding is assigned is (571)-273-8300.

Any inquiry of a general nature or relating to the status of this application or proceeding may be obtained from the Patent Application Information Retrieval (i.e., PAIR) system. Status information for the published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (i.e., EBC) at: (866)-217-9197 (toll-free). Alternatively, status inquiries should be directed to the receptionist whose telephone number is (703) 308-0196.
